

#### Who this affects: All GTR clients

Why it matters: More trust + better inbox delivery

### 📥 Sending Options

Method	Description	Best For
Standard (Recommended)	GTR sends emails on your behalf using your verified domain	Most users
Custom SMTP	You provide your own email server details (host, port, etc.)	Advanced users or IT-restricted orgs

# 🛠 Steps to Set Up (Standard Method)

- 1. Enter your "From Name" and "From Email" in Settings > Sender Configuration
- 2. Click Send Verification
- 3. Add SPF & DKIM DNS records (provided) Click **Verify** to complete the setup
- 4. (Optional) Send a test email

# 🛠 Steps to Set Up (Custom SMTP Method)

- 1. Choose Custom SMTP
- 2. Enter host, port, username, password
- 3. Click Test & Save

#### 🔁 Fallback Logic

- If not configured: Emails will be sent from donotreply@getthereferral.com
- Once verified: Emails will be sent from your branded address
